RE: Your Support for NumFOCUS in 2021

Dear Samuel,

How many times in a given month, or week, or even throughout your day do you utilize a NumFOCUS Project? Whether it's Bokeh and Matplotlib for data viz, for example, or Jupyter Notebooks for fast and easy collaboration between you and your team members, or the speed, performance, and reproducibility of JuliaLang, you and millions of others rely on the open-source software tools that NumFOCUS supports.

Our Sponsored and Affiliated Projects aren't open and accessible by default, though: these cutting-edge scientific software tools are the product of hard work by our project maintainers and contributors with support from users who care about their sustainability. Your financial contribution last year played a key role in our collective success.

Thank you!

We'd like to acknowledge and thank you for your donations to NumFOCUS on behalf of OtoJig GmbH totaling $1,250.00 in 2021. We affirm that no goods or services were offered or provided to you in exchange for this gift. Please accept our sincere gratitude for your generosity.

Our work is made possible by people like you who understand the importance of funding the foundational open-source software projects supported by NumFOCUS. I hope you'll stay connected with us and join NumFOCUS again as we help to enable even more scientific innovation this year!

Best wishes,

Terry Foor

Director of Development, NumFOCUS
